

## **Aluminium enclosures**

### **MODERN INDUSTRIAL ENCLOSURES MADE FROM DIECAST ALUMINIUM**

#### **Advanced industrial enclosures in diecast aluminium**

Since its establishment, ROLEC has specialised in the development and manufacture of innovative aluminium enclosures for industrial electronics and electronic equipment. Significant features include a wide range of standard sizes, ingress protection from IP65 to IP67, modern industrial design and a high standard of fit and finish to ensure the best presentation of your product.

All of our aluminium enclosures can be supplied fully customised and ready to use. Our factory is equipped to carry out all the modifications you may need including drilling, milling, painting, printing, engraving and much more. Talk to our sales team for more information.
