## The ROLEC principle: Technical perfection with top quality.

**Our company founders, Friedhelm, Matthias and Betty Rose, are pioneers of enclosure technology. Sophisticated design and maximum customer benefits are our primary focus. It is for this reason that we ensure our products are of top quality.**

We are a medium-sized family company, steering our global business from the German headquarters in Rinteln an der Weser. ROLEC offers you industrial enclosures produced from aluminium, stainless steel, ASA and ABS, as well as command enclosures and suspension arm systems. We offer a wide range of standard sizes, as well as customer-specific tailored solutions.

One of our particular strengths is machining components to be ready for installation. Using our high-tech production facilities, we modify the enclosures to be ready for installation according to our customers' wishes. We can deliver the finished products at short notice and "just in time" on request. You'll learn more on the following pages.

# From the idea to the ready-to-install enclosure

A family business with a long tradition and aware of its responsibility – learn more about us.

Our passion is enclosures.

High-quality and first-class in every production phase.

**Our special strength lies in the development of new enclosure concepts. Whether mass production that is suitable for series production or individual custom-made products – we at ROLEC are specialised in the special requirements and wishes of our customers.**

We have always set standards with our creativity in developing new products. Numerous products and patents speak for themselves. Whether with the revolutionary single-channel technology, which creates a lot of interior space, our STANDARD EMC housing, which avoids additional costs for expensive EMC seals, or the idea of being able to attach enclosures in a closed state without having to open the sealed space during assembly – ROLEC has always been customer- and application-orientated.

ROLEC enclosures are produced on state-of-the-art die-cast aluminium and plastic-injection moulding machines. High-quality moulds guarantee top quality, so that the housings are largely free of a shrink holes and have a surface that meets the highest demands.

One of our particular strengths is machining components to be ready for installation. Using our high-tech production facilities, we modify the enclosures to be ready for installation according to our customers' wishes and supply them in any colour desired. We can deliver the finished products at short notice and "just in time" on request. We keep all items in our product line in inventory for fast availability. ROLEC can generally provide a sample in one to two workdays. That's standard service at ROLEC.

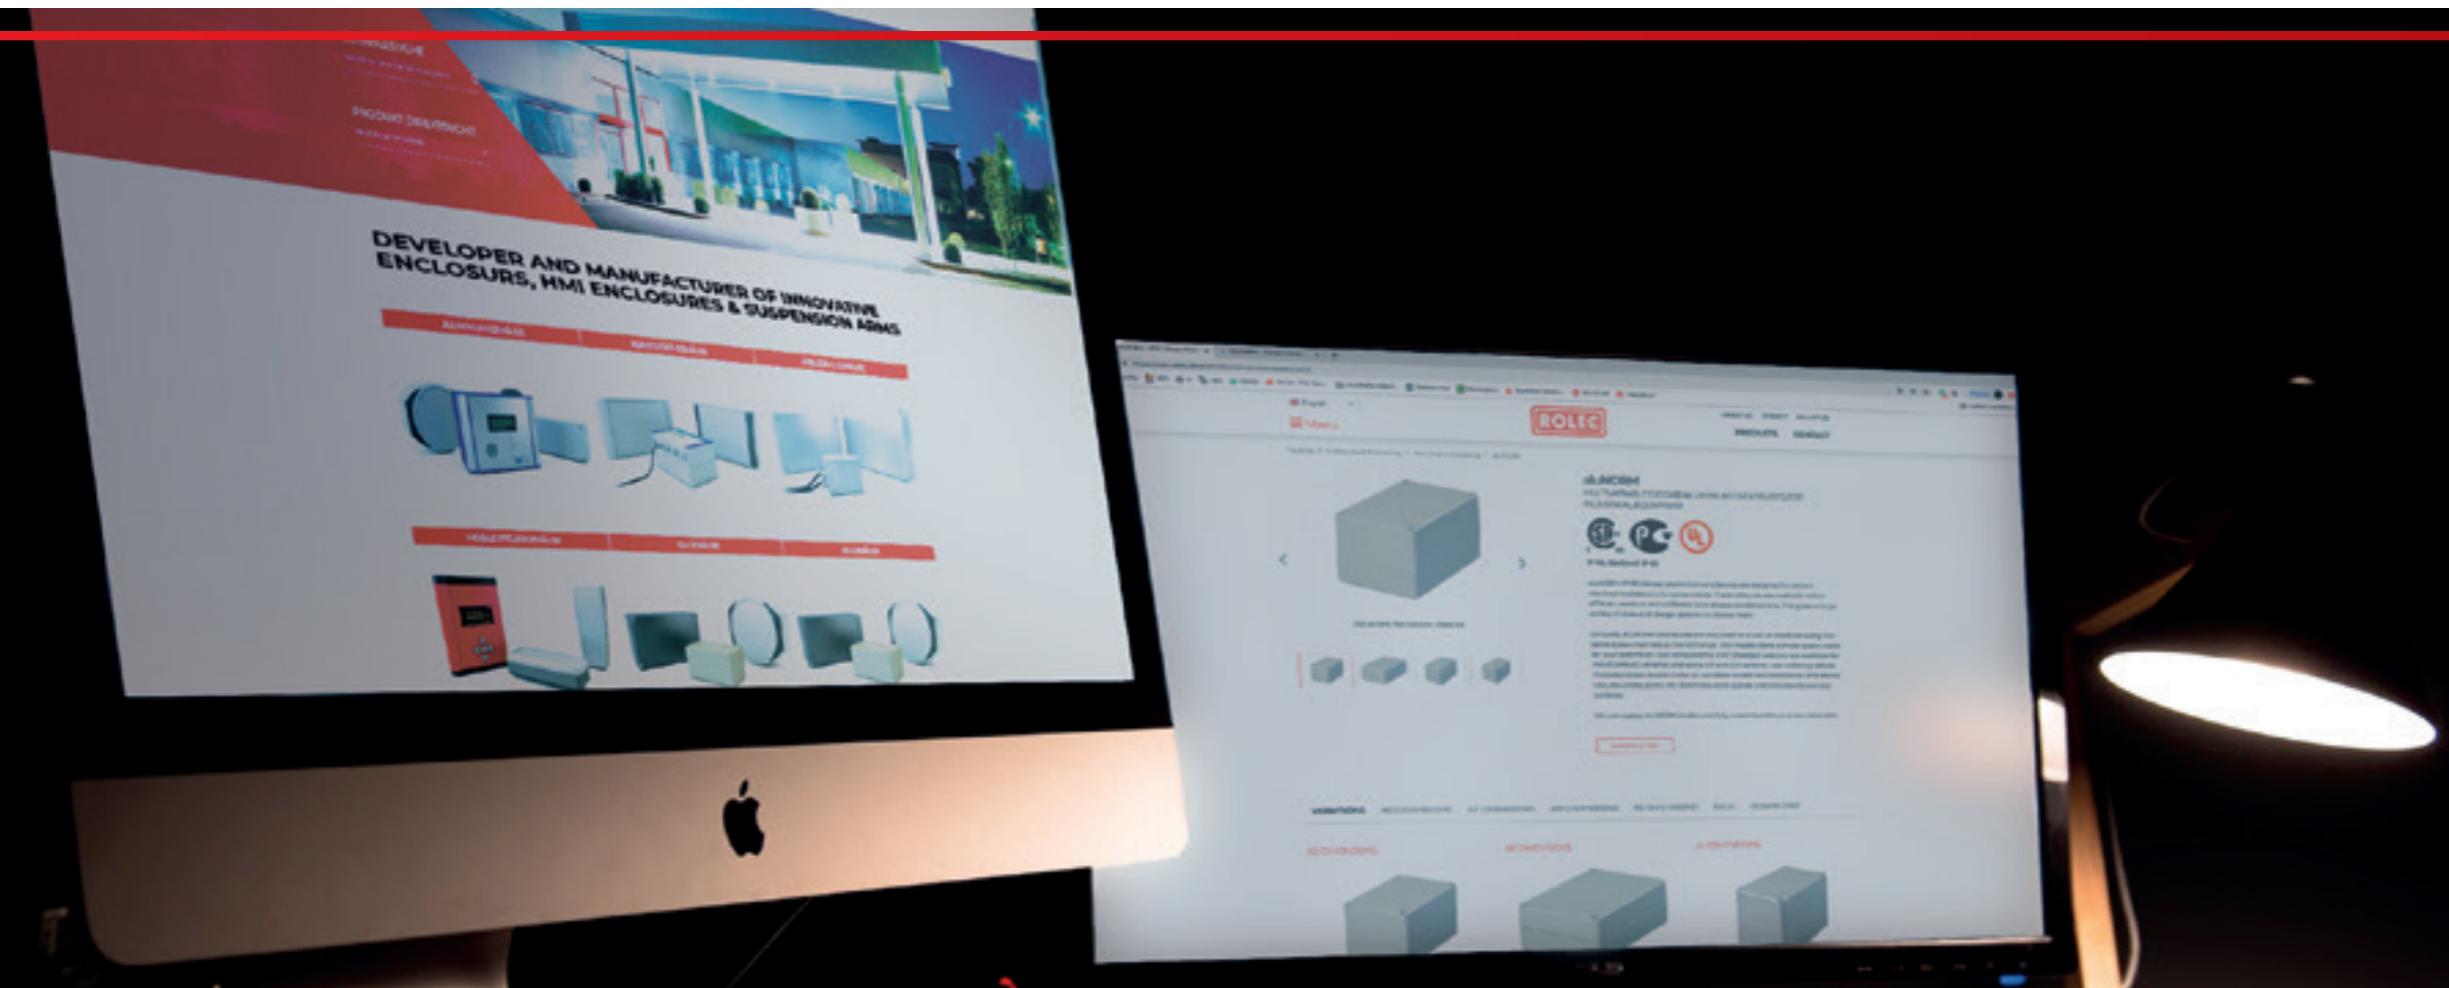

# More information online

Learn all about ROLEC, services and products at the click of a mouse.

Our passion is enclosures.

3D downloads & more can be found for free on our website

**Online, you can quickly find the ideal product for you according to various selection criteria. Whether by ingress protection, approval, dimensions or material – no matter what is important for you: the various search criteria provide you with support when selecting your products.**

Once you have found the right product, you will find the corresponding documentation, 2D and 3D data for each product for download free of charge.

You are welcome to send us an enquiry via the function 'Put product on a watch list', to which you are happy to attach your manufacturing drawings.

And if you have any questions about the products, our staff will be happy to assist you as competent points of contact. You will find them on our website under the menu item 'Contact'.

## CONFIGURATORS

In the main menu you will find the item 'Configurators'. Here you can see which products you can configure directly online. On the product group pages, you will find all documentation for free download.

# At home around the world

Quality Made in Germany – wherever you are in the world.

Our passion is enclosures.

Global sales.

ROLEC is present with its products and services wherever you are in the world. In a number of countries, we have our own subsidiaries. In other countries, we work together with long-term partners. And if this does not include your country, simply get in touch with our headquarters in Germany. We'll be pleased to hear from you!

# Explanation of ingress protection

Per EN 60529 / DIN 40050

Our passion is enclosures.

## DEFINITION OF THE 1st IP CODE

	IP 1st CODE	INGRESS PROTECTION AGAINST CONTACT AND FOREIGN BODIES
	PROTECTION AGAINST	SCOPE OF PROTECTION
0	Not protected. 	-----
1	Large foreign bodies. 	Protection against accidental large surface contact with live and internal moving parts, e.g. by the hand, although no protection against intentional access to these parts. Protection against the penetration of solid foreign bodies with a diameter greater than 50 mm.
2	Medium-sized foreign bodies. 	Protection against contact between the fingers and live or internal moving parts. Protection against the penetration of solid foreign bodies with a diameter greater than 12 mm.
3	Small foreign bodies. 	Protection against contact between live or internal moving parts and tools, wire, etc. with a thickness of more than 2.5 mm. Protection against the penetration of solid foreign bodies with a diameter greater than 2.5 mm.

	IP 1st CODE	INGRESS PROTECTION AGAINST CONTACT AND FOREIGN BODIES
	PROTECTION AGAINST	SCOPE OF PROTECTION
4	Granular foreign bodies. 	Protection against contact with live or internal moving parts with tools, wires etc. with a thickness of more than 1 mm.
5	Dust deposits. 	Complete protection against contact with live parts or parts moving internally. Protection against harmful dust deposits. The ingress of dust is not fully prevented but dust shall not penetrate in such quantities as to affect the functionality.
6	Dust ingress. 	Complete protection against contact with live parts or parts moving internally. Protection against the ingress of dust.

## DEFINITION OF THE 2nd IP CODE

	IP 2nd CODE	INGRESS PROTECTION AGAINST WATER PROTECTION
	PROTECTION AGAINST	SCOPE OF PROTECTION
0	Not protected. 	-----
1	Protected against water droplets. 	Vertically falling droplets must not have any damaging effects.
2	Protected against water droplets if the enclosure is inclined up to 15°. 	Vertically falling droplets must not have any damaging effects if the enclosure is inclined up to an angle of 15° either side of vertical.
3	Protected against water spray. 	Water that is sprayed at an angle of up to 60° either side of vertical must not have any damaging effects.
4	Protected against splash water. 	Water that is splashed against the enclosure from any direction must not have any damaging effects.
5	Protected against water jets. 	Water that is sprayed in a jet against the enclosure from any direction must not have any damaging effects.
6	Protected against powerful water jets. 	Water that is sprayed from any direction as a powerful jet against the enclosure must not have any damaging effects.
7	Protection against the effects of temporary submersion in water. 	Water must not seep into the enclosure in any quantity that may have damaging effects when the enclosure is temporarily submerged under water under standard pressure and time conditions.
8	Protection against the effects of long-term submersion in water. 	Water must not seep into the enclosure in any quantity that may have damaging effects when the enclosure is submerged under water on a long-term basis under conditions that are agreed between the manufacturer and user. These conditions must however be harsher than those for code 7.
9K	Water during high pressure/steam spray cleaning. 	Water that is sprayed in a powerful, increased pressure jet against the enclosure from any direction must not have any damaging effects.

## Cited abbreviations.

The Ingress Protection is specified as abbreviations. These always comprise the identical identification letters IP and TWO CODE NUMBERS for the degree of protection.

As standard, virtually all ROLEC enclosures are designed according to the ingress protection IP 65 and IP 66 and therefore meet the high industrial standard for serial products, i.e. the enclosure offers protection against the ingress of water and dust.

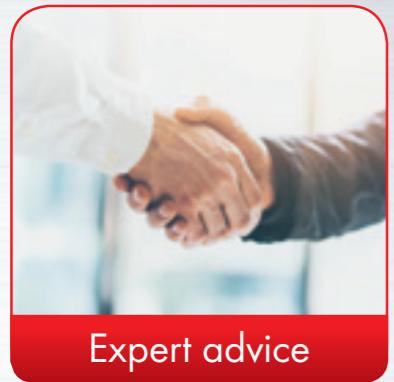

Furthermore, on request ROLEC standard enclosures made of aluminum and polyester can be produced in Ingress Protection IP 67 and IP 69K.

# Personal service for everyone

We support and advise all our customers individually. Regardless of whether for an individual item or series production.

Our passion is enclosures.

## Expert advice

## Sample service

## Drilling

## Milling

## Engraving

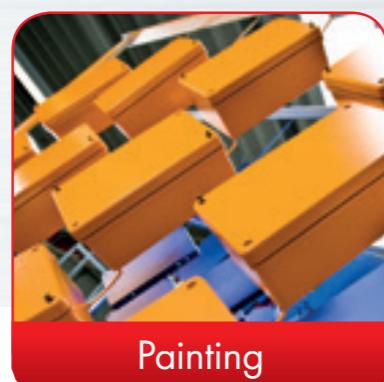

## Lasering

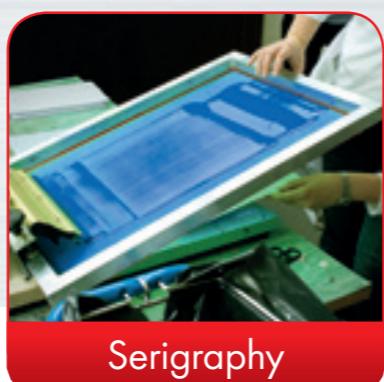

## Assembly

## Powder coating

## Painting

## Serigraphy

## Digital printing

## Accessories

## Membrane keypads

## Digital print films

## EMC enclosures

## Displays

## Prototype design

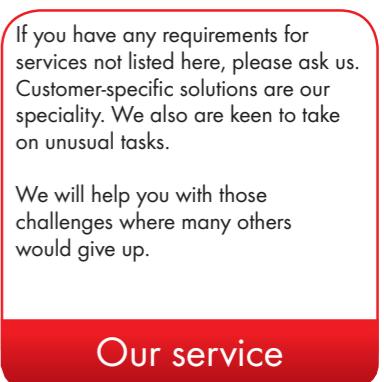

## Special material

## Tool inserts

## Special tools

We offer our conFORM low-price standard EMC enclosure to protect your internal mountings against electromagnetic radiation. On request, we can also supply an EMC-compliant version of any other ROLEC enclosure.

We are able to offer the right made-to-measure display for all our enclosures – in varying sizes and degrees of robustness depending on the application.

We will visualise your ideas in the planning and development stage, making them tangible. As initial samples for tests or the basis for developing applications.

If you need a plastic enclosure in a special material, such as polycarbonate or ASA – no problem. We'll be pleased to produce limited series for you, too.

Our standard tools can accommodate interchangeable inserts in the most frequently used interfaces – allowing modifications to be made. This means that special requests can be realised quickly, reliably and affordably.

Our specialists will be pleased to discuss your customised enclosure design for enclosures and enclosure parts produced in large volumes. We can also realise the most unusual project designs quickly and according to your requirements.

## Aluminium enclosures

Perfect design and technology

Ingress protection IP 66/IP 67, optional IP 69K

## aluDISC

An absolute all-rounder in every respect

**The first round aluminium enclosure for industrial electronics and electronic components. The cover comes with a recess to accommodate a membrane keypad or a front plate. Enclosure can be fastened when the cover is fitted.**

**The key product features:**

- Enclosure material: Die-cast aluminium
- Enclosure surface: powder coating, RAL 7035
- Lid screws in stainless steel 1.4567
- Ingress protection IP 66/IP 67
- Enclosure seal: Silicone moulded gasket

Standard: Clip-on Design covers.

Standard: The enclosure can be fastened when the cover is fitted.

Standard: Integrated recess to accommodate membrane keypad or front plate.

Integrated lid support.

Mounting dimensions

**Ingress protection IP 66, IP 67, optional IP 69K**

## aluCLIC

The quick-change enclosure

**State-of-the-art electronic enclosure, designed for fast installation and quick exchange. The screw mounting at the rear allows virtually all the enclosure front to be used.**

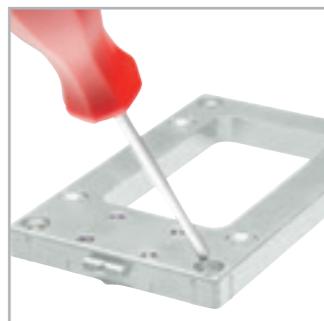

### The key product features:

- Enclosure material: Die-cast aluminium
- Enclosure surface: powder coating, RAL 7035
- Enclosure can be mounted even when the lid is fitted
- Integrated recess in cover for membrane keypad or front plate
- Snap-on fastening to quick-change support
- Enclosure front almost fully usable
- Lid screws in stainless steel 1.4567
- Ingress protection: IP 66, IP 67
- Enclosure seal: TPE moulded gasket, silicone-free

Standard: Snap-on instead of screw-on.

Standard: Snap-on support.

Standard: More space for internal components.

Standard: Lid fixed from the rear.

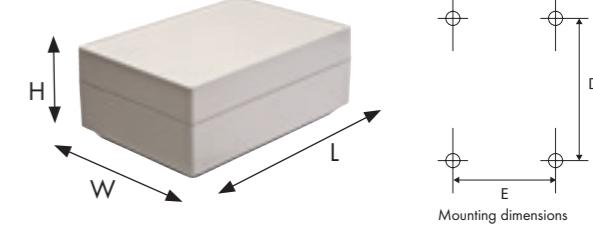

Approvals:

## aluPLUS

The plus side of technology and design

**Numerous areas of application. Suitable for wall attachment outdoors as well as industrial electronics and mechanical engineering. Snap-on design covers conceal the lid fixings and mounting screws, giving the enclosure an attractive appearance.**

**The key product features:**

- Enclosure material: Die-cast aluminium
- Enclosure surface: powder coating, RAL 7035
- Compatible with standard enclosures available on the market, therefore easy to exchange
- Lid screws in stainless steel 1.4567
- Ingress protection IP 66
- Enclosure seal: Silicone moulded gasket

Standard: Clip-on design covers. PBT, RAL 7016

Standard: The enclosure can be mounted even when the lid is fitted.

Standard: Integrated recess to accommodate a membrane keypad or front plate.

Integrated lid support.

## aluNORM

The multivariable aluminium enclosure

**Four versions available in a huge number of standard sizes. Can be combined, from extremely flat to extremely high. Single-channel mounting provides even more space to install electronic components inside.**

### The key product features:

- Enclosure material: Die-cast aluminium
- Enclosure surface: powder coating, RAL 7035
- Single-channel mounting for greater installation volume
- Sizes compatible with polyTOP polyester enclosures, therefore easy to exchange
- Lid screws in stainless steel 1.4567
- Ingress protection IP 66
- Enclosure seal: TPE moulded gasket, silicone-free O-ring gasket (CR)  
Profile seal (CR)

External mounting.

Exterior hinge.

Hold hinge.

Internal (sprung) hinge.

aluNORM version AF  
Flat lid, flat bottom

aluNORM version AS  
Flat lid, high bottom

aluNORM version AD  
High lid, flat bottom

aluNORM version AH  
High lid, high bottom

Approvals:

**Ingress protection IP 66, optional IP 67**

## aluTWIN

The two-chamber aluminium enclosure

**High-performance aluminium enclosure with twin-chamber system for heavy duty operation. It allows electronic components to be kept separate from the terminal area and thereby protecting them during wiring work.**

### The key product features:

- Enclosure material: Die-cast aluminium
- Enclosure surface: Lid powder coating RAL 7040, bottom powder coating, RAL 7035
- Secure connection technology due series terminals in a connection space opened separately
- Chambers can be separated by isolation wall
- Lid screws in stainless steel 1.4567
- Ingress protection IP 66
- Enclosure seal: TPE moulded gasket, silicone-free
- Connection space: O-ring gasket (CR)

Design with equally high covers.

Design with two heights.

KTE series:

... aluTwin with bezel lid and front panel.

## Stainless steel enclosures

High protection for valuable equipment

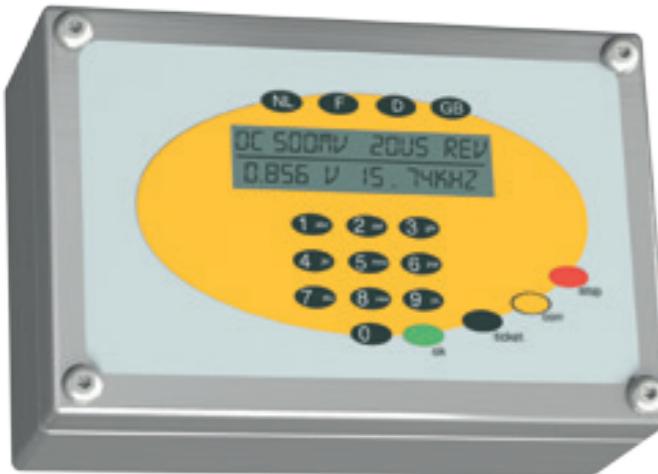

**Ingress protection IP 66/IP 67, optional IP 69K**

## inoCASE A4

Unique stainless steel enclosures

The new standard for industrial electronics enclosures in stainless steel. With captive lid screws. Fastening outside the sealed interior thanks to internal fastening channels.

**The key product features:**

- Enclosure material: A4 sheet stainless steel, 1.4404 (AISI 316L), 1.25 mm sheet thickness
- Applications in a marine environment, resistant to aggressive environmental conditions
- Lid screws in stainless steel 1.4404
- Ingress protection IP 66/IP 67
- Enclosure seal: Silicone gasket

## Mobile control enclosures

Handheld enclosures for mobile use

Ingress protection IP 66, optional IP 67

# handCASE

The robust handheld enclosure

**Thanks to its ergonomic design, the enclosure sits well in your hand. The special wall strength of the enclosure provides robust protection for internal mountings even in the most extreme conditions. The heavy-duty enclosure is available with or without a battery compartment.**

#### The key product features:

- Enclosure material: Die-cast aluminium
- Enclosure surface:  
handCASE lid: powder coating, silver-metallic  
handCASE bottom: powder coating, RAL 9005  
handCASE-R: powder coating, RAL 7035
- Lid screws stainless steel 1.4567
- Integrated recess in cover for membrane keypad or front plate
- Ergonomic design for non-fatiguing work
- Ingress protection IP 66
- Enclosure seal: TPE moulded gasket, silicone-free

Holding clip and mounting bracket.

Shoulder strap with protective caps for mobile use.

Battery compartment...

...for internal power supply.

## aluDISPLAY

The designer extruded display enclosure

**The display enclosure comes with a modern design and well-thought out product features. Ideal for electronic controls and operating units with flat modules.**

### The key product features:

- Enclosure material: Aluminium profile
- Lid material: Die-cast aluminium
- Enclosure surface: profile anodised silver, Lid RAL 9005, coupling tube RAL 7035
- Versatile display and operating enclosure for flat modules
- Lid screws stainless steel 1.4567
- Ingress protection IP 54
- Lid gasket: TPE moulded gasket, silicone-free
- Profile gasket: O-ring gasket (CR)

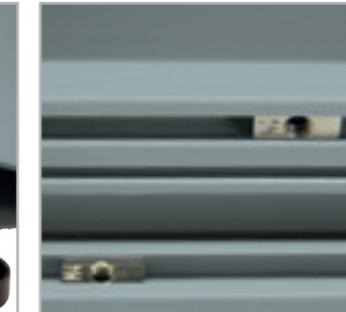

Simple and quick assembly without dismantling the basic enclosure.

Can be used as desk version or on the taraPLUS suspension system.

Internal guide rails for inserting PCBs – only one cover lid has to be removed.

Profile for inserted circuit boards or for assembling internal mountings using spring nuts.

### Ordering overview aluDISPLAY:

## Plastic enclosures

High-quality ASA and ABS – for indoor and outdoor use

**Ingress protection IP 66**

## starCASE

The stylish ASA designer enclosure

**Multi-purpose enclosure made from flame-retardant ASA + PC. starCASE is ideally suited for any type of application and is also a perfect enclosure in visual terms thanks to its ergonomic and modern design.**

### The key product features:

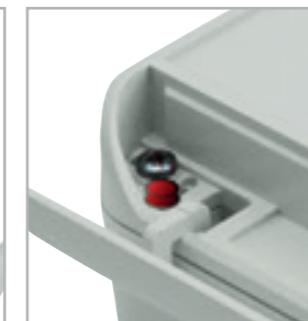

- Enclosure material: ASA + PC
- Enclosure colour similar to RAL 7035
- Lid screws stainless steel 1.4567
- Integrated recess in cover for membrane keypad or front plate
- Design covers to conceal the assembly level
- Fire protection class UL94 V-0
- Ingress protection IP 66
- Enclosure seal: Silicone moulded seal

Standard: Integrated lid support.

Standard: The enclosure can be mounted when the lid is fitted.

Sealing set.

Access safeguard by means of insert lock.

## technoDISC

An absolute all-rounder in every respect

**The first round ASA + PC enclosure for industrial electronics and electronic components.**  
**The cover comes with a recess to accommodate a membrane keypad or a front plate. Enclosure can be mounted when the lid is fitted.**

### The key product features:

- Enclosure material: ASA + PC
- Enclosure colour similar to RAL 7035
- Lid screws stainless steel 1.4567
- Fire protection class UL94 V-0
- Ingress protection IP 66
- Enclosure seal: Silicone moulded seal

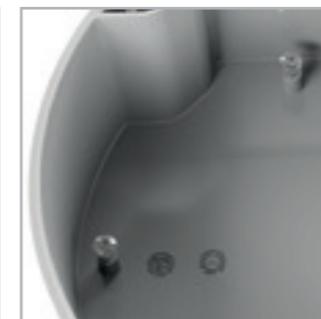

Standard: Clip-on Design covers.

Standard: The enclosure can be mounted when the lid is fitted.

Standard: Integrated recess to accommodate membrane keypad or front plate.

Standard: Fastening options in the enclosure bottom for internal mountings.

## technoPLUS

UV-resistant ASA enclosure

**Attractive and modern enclosure made of high quality UV-resistant ASA for electronics applications, especially outdoors. The screw channels are concealed by the clip-in hinged design covers.**

### The key product features:

- Enclosure material: ASA, UV-stabilised
- Enclosure surface: similar to RAL 7035
- Lid screws stainless steel 1.4567
- Integrated recess in cover for membrane keypad or front plate
- Fire protection class UL94 HB
- Ingress protection IP 66
- Enclosure seal: Silicone moulded gasket

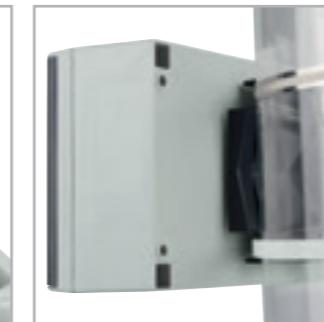

Standard: The enclosure can be mounted when the lid is fitted.

Standard: Design covers from PP, RAL 7016

Standard: Integrated lid support.

 Pole/mast support ( $\varnothing 30\text{--}70$  and  $>70$  mm).

## technoBOX

Elegant standard enclosure in ABS

**A modern, inexpensive and attractive enclosure for all kinds of electronic and electrical equipment. The slanted lid edges give the enclosure an special appearance.**

**The key product features:**

- Enclosure material: ABS
- Enclosure surface: similar to RAL 7035
- Lid screws stainless steel 1.4567
- Fire protection class UL94 HB
- Ingress protection IP 66
- Enclosure seal: O-ring gasket (CR)

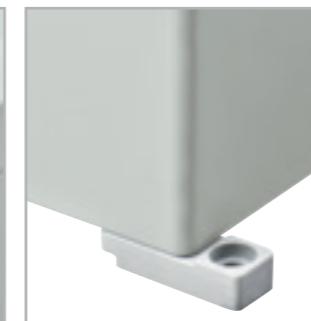

Standard: Alternative design due to slanted lid edges.

Standard: Integrated recess in the lid for a membrane keypad or front plate.

Exterior hinge.

External mounting feet - rotate through 90°.

## Polyester enclosures

Weather-resistant and functional

**Ingress protection IP 66 / optional IP 67**

## polyTOP

The modular polyester enclosure

**Ideal for all types of electronic or electrical equipment thanks to the wide range of standard sizes. Ideal for outdoor applications, as well. The enclosure lid screws are made of corrosion-resistant polyamide and are available in a number of different shapes.**

### The key product features:

- Enclosure material: glass-fibre reinforced polyester
- Enclosure surface: similar to RAL 7032
- Lid screws in polyamide
- Compatible assembly dimensions with the aluNORM series
- Flammability: UL94 V-0
- Ingress protection IP 66
- Enclosure seal: O-ring gasket (CR)

External mounting brackets – rotate through 90°.

Large selection of...

...locking plugs.

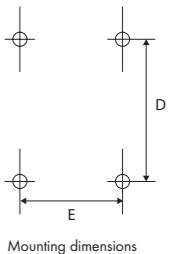

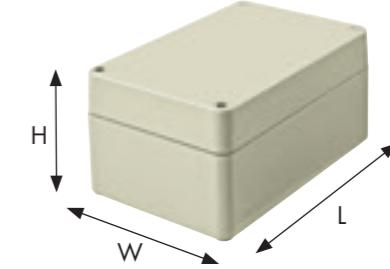

Exterior hinges.

## HMI, control and command enclosures

The right solution for machine control

Ingress protection up to IP 65

## multiPANEL Display

The designer control/display enclosure

**The all-round talent in a purist, multi-variable design. It offers the option of integrating every conceivable application. This version facilitates the permanent installation of a front plate/operating unit or glass front, e.g. for touch screen applications.**

### The most important product features:

- Enclosure material: Aluminium profiles, Stainless steel decorative inlays
- Enclosure surface: Body and rear wall or doors RAL 9005
- Profile enclosure – high-precision production from 150 x 150 mm to 800 x 800 mm
- Firmly glued aluminium front plate
- 3 enclosure heights: 70, 85 and 130 mm
- Direct access possible with three door designs
- Rear wall bolted (only MPD 00), Lock and hinge RAL 9005
- Connection to the profiPLUS 50 suspension system
- Ingress protection to IP 65
- Enclosure seal: Silicone foam

Standard: Available in three heights.

multiPANEL display – with aluminium front plate or glass front preparation.

Keyboard and mouse holder.

Profile handle.

You can find detailed information on this product in our separate brochure  
»profiPANEL – multiPANEL – profiPLUS 50/70« and available to download on our website, [www.rolec.de](http://www.rolec.de)

The designer command enclosure

**The all-round talent in a purist, multi-variable design. It offers the option of integrating every conceivable application. This version allows many commercially available panel PCs or front plates to be directly inserted from the front or back.**

### The most important product features:

- Enclosure material: Aluminium profiles, Stainless steel decorative inlays
- Enclosure surface: Body and rear wall or doors RAL 9005
- Profile enclosure – high-precision production from 150 x 150 mm to 800 x 800 mm
- Panel PC direct installation or with front or interior insertion of front plate
- 3 enclosure heights: 70, 85 and 130 mm
- Direct access possible with three door designs
- Connection to the profiPLUS 50 suspension system
- Rear wall bolted (only MPK 00), Lock and hinge RAL 9005
- Connection to the profiPLUS 50 suspension system
- Ingress protection to IP 65
- Enclosure seal: Silicone foam

Available in any colour desired.

With front plate inserted from the front or inside.

Handle.

Keyboard holder.

Approvals:

**Ingress protection up to IP 65**

## profiPANEL Standard

The economical version with 90 mm depth

**For everyone in a rush, who requires only a small unit quantity or who does not need millimetre-precise dimensions: We have developed the »profiPANEL Standard« for you. Four standard sizes from a 90 mm basic profile with individually configurable front plate into which every panel PC and additional buttons or switches can be incorporated. The rear wall features locks and hinges on the longer sides.**

### The key product features:

- Enclosure material: Aluminium profiles PA corner covers, RAL 7035
- Enclosure surface: anodised silver
- Ingress protection to IP 65
- Enclosure seal: EPDM

You can find detailed information on this product in our separate brochure  
»profiPANEL – multiPANEL – profiPLUS 50/70« and available to download on our website, [www.rolec.de](http://www.rolec.de)

• Standard    ○ Optionally available

### 4 simple steps to a perfectly coordinated, economical control enclosure:

1: Select enclosure dimensions based on the planned internal mountings\*.

2: Define the machining of the front plate required.

3: Define the position of the suspension arm fixing.

4: On request, select pro handle(s). Possible on the side or at the bottom of the enclosure.

**10"-12"**

For internal mounting of 10 to 12 inch\*  
Assignment space: 355 x 355 mm  
External dimensions: 400 x 400 mm  
Rear wall with locks and hinges

**12"-15"**

For internal mounting of 12 to 15 inch\*  
Assignment space: 355 x 475 mm  
External dimensions: 400 x 520 mm  
Rear wall with locks and hinges

**15"-17"**

For internal mounting of 15 to 17 inch\*  
Assignment space: 475 x 475 mm  
External dimensions: 520 x 520 mm  
Rear wall with locks and hinges

**17"-21"**

For internal mounting of 17 to 21 inch\*  
Assignment space: 475 x 555 mm  
External dimensions: 520 x 600 mm  
Rear wall with locks and hinges

\* The internal mounting sizes for panel PCs are intended only as a guideline figure as the manufacturer's air circulation values also need to be taken into consideration.

**Ingress protection up to IP 65**

## profiPANEL Individual

The modern HMI/control enclosure series

**Thanks to the option of combining three basic profile widths, it is possible to realise a total of 8 individual mounting depths. In this way, almost every conceivable configuration for the internal mounting of components can be realised. The design facilitates almost seamless, flush installation of the front plate, which is permanently connected with the enclosure. Appropriate cut-outs for a display, switches, etc. are included in the service provided by ROLEC and are produced ex-works to meet customer specifications.**

### The key product features:

- Enclosure material: Aluminium profiles
- Enclosure surface: anodised silver
- Profile enclosure – manufactured to measure from depths of 60 mm to 300 mm
- Direct access through doors with locks and hinges (on the longer side as standard)
- Ingress protection to IP 65
- Enclosure seal: EPDM

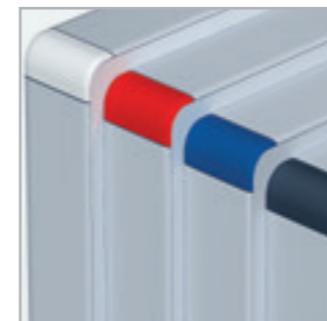

Wall connection with left and right stop possible.

Profile handles possible on the side or bottom of the enclosure.

Keyboard holder.

Coloured corners alternatively in RAL 3020, 5017 or 9005.

You can find detailed information on this product in our separate brochure  
»profiPANEL – multiPANEL – profiPLUS 50/70« and available to download on our website, [www.rolec.de](http://www.rolec.de)

## multiVISION Display

The variable control/display enclosure

**Ideal as display enclosure for indoor and outdoor use thanks to ingress protection IP 65. Can also be used as a control enclosure.**

**The key product features:**

- Enclosure material: Die-cast aluminium and aluminium profiles
- Enclosure surface: powder coating, RAL 7040
- Assembly of front plates without visible screws
- Ingress protection IP 65
- Enclosure seal: O-ring gasket (CR), Profile seal (CR)

One-piece profile, back panel with hinge and lock.

Two-piece profile (e.g. 120/60) with lock and hinge.

Handle system available in RAL 3020 or RAL 9005.

Connection to all ROLEC suspension systems possible.

Approvals:

Ingress protection IP 65

## multiVISION Command

The variable command enclosure

**The body of the main profile was developed with a cooling element look for design reasons. The combination of three different profiles offers a great deal of space for internal equipment.**

### The key product features:

- Enclosure material: Die-cast aluminium and aluminium profiles
- Enclosure surface: powder coating, RAL 7040
- Assembly of front plates without visible screws
- Ingress protection IP 65
- Enclosure seal: O-ring gasket (CR)

Profile seal (CR)

One-piece profile, back panel with hinge and lock.

Two-piece profile (e.g. 120/120) with lock and hinge.

Two-piece profile (e.g. 120/60).

multiVISION Kommando: handle system possible for every size.

## Suspension systems

For connecting control systems perfectly

Ingress protection IP 54

# profiPLUS 50

## The designer suspension system

**The design harmonises perfectly with that of machinery. Time-saving assembly, a range of system components and numerous panel adapters for connecting panel PCs from leading vendors give the system an unrivalled advantage.**

### The key product features:

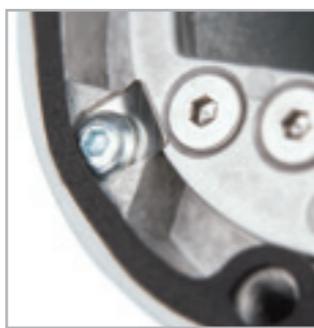

- System parts material: Die-cast aluminium, powder coating, RAL 7035
- Suspension profile material: Aluminium profile, in anodised silver
- Matching adapters, e.g. for Beckhoff, Siemens, B&R and further panel manufacturers
- Many couplings with pre-fitted suspension profile as standard
- Can be used with all ROLEC control enclosures; the perfect complement to 'multiPANEL' and 'profiPANEL'
- Possible to route connectors such as HDMI, DVI, network adapters, etc.
- Integrated cable protection
- Ingress protection IP 54
- Gasket: Chloroprene (CR)

Whether profiPLUS 50 or 70: both systems offer sufficient space for cable routing.

Simple height adjustment with patented 'screw adjustment'.

End-to-end potential equalisation to protect humans and equipment.

Matching adapters, e.g. for Siemens, Beckhoff, B&amp;R.

Ingress protection IP 54

Standard: Integrated cable protection in all joint parts.

Standard: Integrated set screw system for adjusting the pivoting range.

70/50 adaptor for the transition to profiPLUS 50 couplings.

Signal light adapter for joint and elbow.

# profiPLUS 70

The designer suspension system

**The design harmonises perfectly with that of machinery. Time-saving assembly, a range of system components and the possibility to adapt to the 50-series system in order to use all 50-series connections give the system an unrivalled advantage.**

#### The key product features:

- System parts material: Die-cast aluminium, powder coating, RAL 7035
- Suspension profile material: Aluminium profile, in anodised silver
- '70/50 adaptation', e.g. in order to use the adapter with the panel manufacturers listed together with profiPLUS 50
- Many couplings with pre-fitted suspension profile as standard
- Can be used with all ROLEC control enclosures; the perfect complement to 'multiPANEL' and 'profiPANEL'
- Possible to route connectors such as HDMI, DVI, network adapters, etc.
- Comprehensive potential equalisation
- Ingress protection IP 54
- Gasket: Chloroprene (CR)

## taraPLUS

The multi-variable suspension system

**The special design combines round and square profiles, thereby achieving high static equilibrium. Large openings in the system parts allow cables to be easily fed through.**

### The key product features:

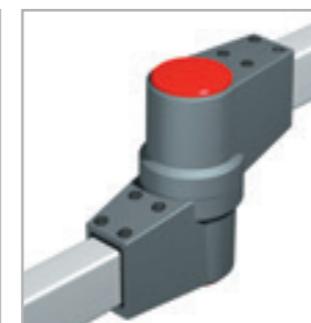

- Profile cross-sections: round Ø 48 and 70 mm, rectangular 40x60 mm
- System parts material: Die-cast aluminium, powder coating, RAL 7040
- Suspension profile material: drawn steel, powder coating, RAL 7035
- Simple and quick adjustment with set screws
- Can be used with all ROLEC control enclosures
- Possible to route connectors such as HDMI, patch cable, USB, etc. (not for DVI connectors)
- Ingress protection IP 54
- Gasket: Chloroprene (CR)

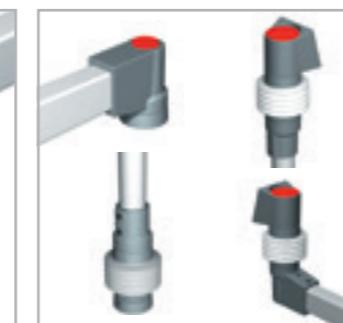

Various connections available.

Support profiles: a combination of round and/or rectangular tubes.

Intermediate joint, articulated.

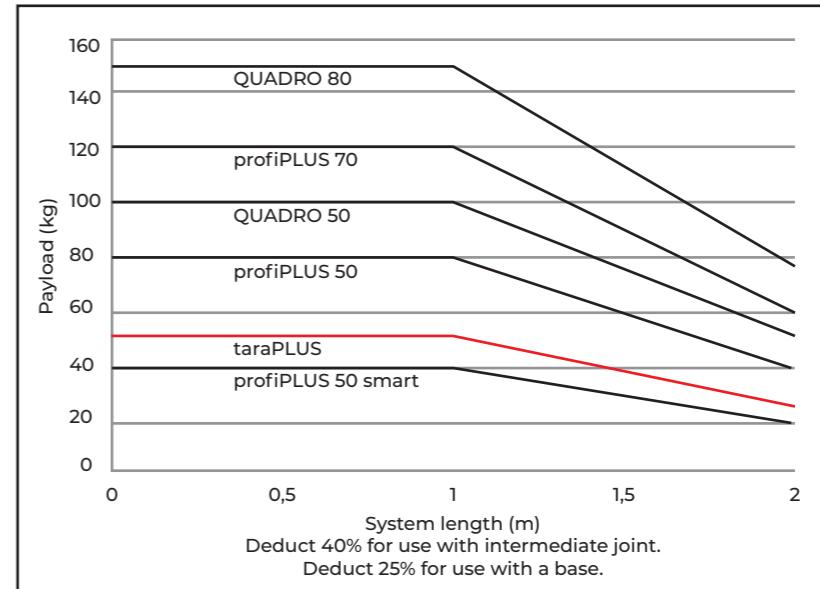

Various couplings available.

Ingress protection IP 54

## QUADRO 50/80

Suspension system for heavy loads

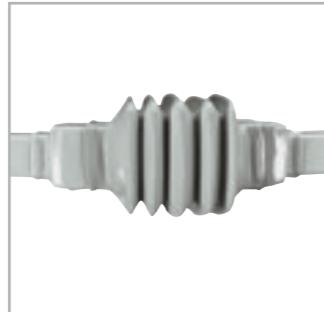

The system consists of spheroidal graphite parts that provide higher-than-average bearing strength. The overall static equilibrium of the system is also very high due to its combination with steel profiles.

### The most important product features:

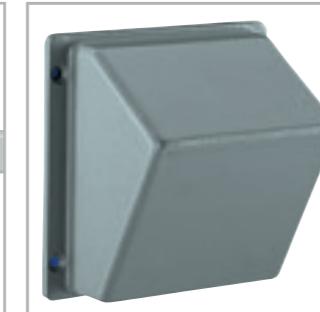

- Profile cross-sections: Square 50 and 80 mm
- System parts material: die-cast aluminium / spheroidal graphite iron, powder coating, RAL 7040
- Suspension profile material: drawn steel, powder coating, RAL 7035
- transition from square 50 mm (QUADRO 50) to round Ø48 mm (taraPLUS) possible through special elbow
- Can be used with all ROLEC control enclosures
- Possible to route connectors such as HDMI, DVI, network adapters, etc.
- Ingress protection IP 54
- Gasket: Chloroprene (CR)

Various connections available.

Intermediate joint with bellows.

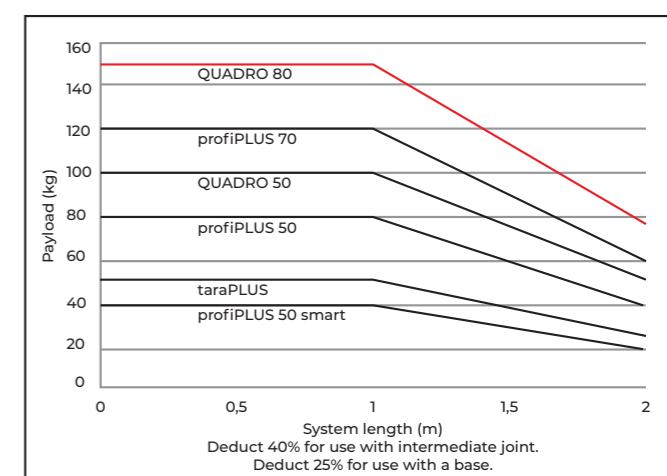

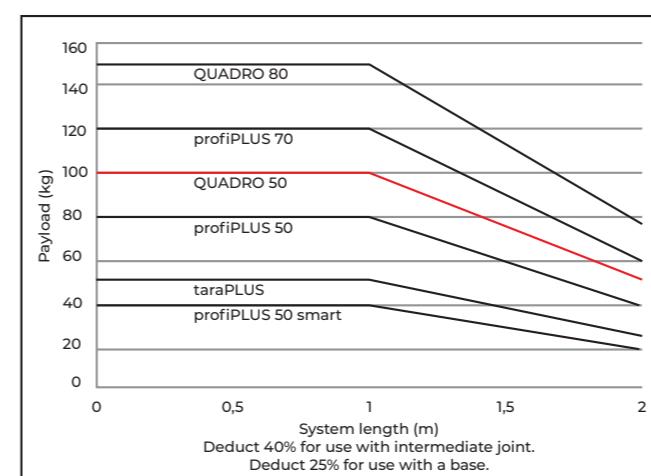

Inclination adaptor 30 and 60 degrees.

Signal light adaptor for QUADRO 50 and 80 elbows.

In addition to the standard components shown here, we can also supply alternative products from other manufacturers on request. Talk to our sales team. All information is subject to change without prior notice. Claims for typographical or other errors are will not be accepted.

## Accessories

Suitable solutions for every application

Visit our website to find the matching standard accessories for each individual item number.  
For further accessories, please get in touch with our sales experts.

### Accessories for the ROLEC enclosure range:

- Hinges, special seals, supporting rails, terminals, cable glands, pressure equalisation elements, external mounting brackets for wall-mounted enclosures
- Stand up shackles for table-mounted enclosures
- A range of accumulator holders, carry straps, wall brackets, handles, holding clips and suspension arm adaptors

Ø = Clamping area in mm

## Example customers

An small selection from our customer base

With our good name, that is what we stand for.

**Thanks to our numerous customers, large and small, we have been around for over 30 years.**

With innovativeness and great expertise, we have been developing and producing enclosures, suspension systems and command enclosures for customers in the fields of industry, measurement technology, electrical engineering, research & development, machinery and plant engineering.

When a customer has a question, then we listen attentively. When a customer has a special need, we try to meet it. This is how we constantly improve our products, our services and our long-term business relationships.

ROLEC provides its customers with first-class products and services. We provide support for customer requirements to the greatest extent possible with our on-site presence. We create true added value for our customers' applications.

## For your notes

Space for drawing or writing

Information in our technical data is non-binding. All information is provided to the best of our knowledge, although the actual applications lie outside our sphere of influence. Therefore, the information we provide does not release the buyer from the responsibility of checking the products for their suitability for the intended processes and purposes. We reserve the right to make technical changes and to further develop our products. Any such changes, as well as errors and misprints shall not give rise to claims for compensation. Our complete product range has been RoHS-compliant since 1 March 2005. In the future, we shall continue to supply to customers who demand specific processes, because their products do not fall under the scope of directive 2011/65/EU.

Our *passion* is enclosures.

Think tank, technology leader, problem solver and a partner that you can trust. That is what makes ROLEC what it is and what it will always be.
